

WHEELCHAIRS

The MWD range of wheelchairs are designed to provide and promote maximum independence and mobility for a wide range of users including those with short term mobility issues as well as individuals with more complex needs.

For long term wheelchair users, we recommend seeking a prescription from a trained healthcare professional to ensure an optimal ergonomic fit to both their body and their lifestyle.

MWD wheelchairs vary in seat width, depth and height as well as backrest and armrest height and footrest length. Many of our wheelchairs also offer different backrest and seat angles to enable the best posture for the user.

Many of our self-propelled chairs have quick release wheels which enable transit wheels to be attached if needed.

OVERVIEW OF FEATURES

	Self-Propelled	Transit Wheels	Elevating Leg Rests	Stump Supports	Folding Backrest	Paediatric
